

**Date:** 17 February 2025

**Job Title:** Junior Laboratory Services Specialist

**Job Code:** IMGL.68/99.1

**Quick description:** Full-time, 1-year contract - renewable, onsite, starting 2025

**Immagina** is looking for a highly motivated and skilled Junior Scientist to join our Service Team. The successful candidate will play a pivotal role in supporting our service operations and contributing to our team's success. We encourage applications from candidates belonging to protected categories, in compliance with Italian Law 68/99-1. Applicants who meet the requirements of Law 68/99-1 will be given priority consideration.

### **Responsibilities:**

- Adhere to established company guidelines for service execution, which include:
  - Conducting wet lab activities for clients within the company's laboratory, following defined workflows and timelines, reporting all tasks to the direct responsible of the asset;
  - Assisting with ancillary tasks such as technical consultations, obtaining sample forms from clients, and tracking incoming sample shipments;
  - Recording the arrival of samples, ensuring proper storage, and promptly reporting any discrepancies to the service team and manager;
  - Executing protocols in accordance with Standard Operating Procedures (SOPs), participating in discussions regarding results, and aiding in experimental design and optimization efforts with clients..
- Coordinating and collaborating with the Service team through dedicated meetings to ensure alignment and progress.
- Supporting reporting activities and facilitating project closure.

### **Qualifications:**

- **Education:** Master's degree in Biology, Biochemistry, Molecular Sciences, or Biotechnology (PhD is a plus).
- **Experience:** A minimum of one year of experience in fundamental molecular biology techniques. Experience in RNA analysis and translational regulation is considered a plus
- **Skills:**
  - Excellent organizational and planning skills.
  - Strong capacity to report data and results in accordance with internal guidelines.
  - Supporting the preparation of reports and project closure documentation
  - Ability to work autonomously in the laboratory while following established protocols, performing wet-lab workflows in alignment with pre-established timelines.
  - Strong enthusiasm and a natural predisposition for teamwork, with the ability to contribute positively and proactively in a collaborative environment.
  - Fluent in English (written and spoken).
  - Proficiency in Microsoft Office (Excel, Word, Teams, etc.).

### **Benefits:**

- Competitive salary and benefits package.
- Opportunity to work on cutting-edge research projects.

- Collaborative and supportive work environment.
- Professional development opportunities.

### **About Us:**

Immagina Biotechnology is a company located in the scenic region of Trento, nestled amidst the Dolomite Mountains in Italy. Our mission is driven by a passion for technological innovation, fueled by the natural beauty surrounding us. We focus on RNA and ribosome biology, enabling scientists to study translation mechanisms in action. Our goal is to develop innovative products that leverage the biochemistry of translation to provide novel approaches to treat diseases with unmet clinical needs. We embrace respect, equality, and inclusivity as core values, rejecting all forms of discrimination. At Immagina Biotechnology, we nurture a global culture of open innovation, sustainability, advancement, and diversity.

### **Location:**

Our headquarters are located in Pergine Valsugana (Trento, Italy), in a brand-new facility alongside other innovative biotech companies. More information on our website: [CONTACT \(immaginabiotech.com\)](https://www.immaginabiotech.com)
