## Company team member – Postdoctoral Researcher

**Immagina Biotechnology s.r.l.** is seeking an experienced postdoctoral fellow who is energetic, enthusiastic, and enjoys collaborative and applied science.

### Skills

- A PhD related to Biomedical or Biological Sciences
- RNA-Seq, immunoblotting, cloning, genome editing and cell transfection
- Strong background in proteomics (SILAC or PUNCH-P) with hands-on expertise in mass spectrometry and relative data interpretation (e.g. HPLC, Maldi-MS, MS/MS, UPLC, UV)
- Cell culture techniques: mouse and human cell maintenance and differentiation
- Ability to work in a high-pace and dynamic scientific environment
- Excellent organizational and analytical skills
- Excellent inter-personal and communication skills / ability to build good working relations
- Proven ability to present and publish research data
- Proficiency in spoken and written English
- Happy to work together with, and supervise, other lab members. Ideally, you should have considerable experience in experimentally investigating proteins, protein-RNA interactions, small molecules-RNA interaction. You will need to be able to develop sensible and creative methods to study ribosome/mRNA targeted small molecule activity.

### Important but not essential

Business / tech-transfer experience

**Who we are**

Immagina BioTechnology s.r.l is a company focused on RNA/ribosome targeted small molecule and selective capture of active ribosomes. The Company is hosted in a private incubator (*Laboratory for Biomolecular Sequence and Structure Analysis for Health – FBK – Trento – Italy*)

**Job ID N°: 003**

**Please send Curriculum vitae, Letter describing your interest and Contact of three reference persons to [info@immaginabiotech.com](mailto:info@immaginabiotech.com). We will hold on to your resume and contact you only if your profile meets our needs.**
